

The following is a list of several of our accredited programs and collaborations:

- We have collaborative agreements with St. Joseph Behavioral Health, Hope House, Transitions, and Jubilee House to provide clients with a full continuum of care.
- We provide Family Functioning Assessments for the Department of Child Services as well as psychosocial and psychosexual assessments. These assessments assist the State of Indiana in determining appropriate levels of care for abused and neglected children.
- We provide Employee Assistance Services at these different levels: assessment; referral and/or counseling, when needed; training and crisis incident debriefing.
- We provide parenting classes, as needed.
- We provide consulting services to other businesses and not-for-profits in regards to accreditation process and best practice standards.
- We provide training to other professionals to help them maintain licensure and certification.
- We continue to see children in our play therapy rooms and with their families to help reduce child abuse, child neglect, domestic violence, and to improve quality communication among children and their families.
- We continue to help individuals, couples and families, in a host of situations and settings to address life situations that have become problematic. We serve the non-traditional family unit as well as the traditional.
- We have created a significant niche in our community in helping individuals with chronic and terminal illnesses. We are sought out by many individuals who have heard of us through word of mouth because of our effective contacts with their friends and families.
- We provide counseling for individuals, children and families who live at Vincent House to help them deal with the emotional struggles of being homeless that lead into the issues of helplessness and hopelessness.
- We provide a family/group experience at Hope House for new arrivals and for those women who are about to be discharged. We work with these women and their families to help them understand one another and to ensure a more effective interaction and commitment towards living a healthy alcohol and drug-free life.
- We provide parenting classes for women with addiction issues who are residents of Hope House.
- Relapse Prevention Program. This program has been developed to address alcohol and drug issues and was designed to help address the needs of individuals in half way houses. However, this is an open program available to individuals who need Relapse Prevention information to help remain drug and alcohol free. This program has received two awards for its outstanding curriculum and effectiveness.
- Alcohol and Drug Outpatient Treatment. This group treatment for alcohol and drugs ranges from 20-72 hour programs and is in cooperation with Allen Superior Courts, Criminal Division Services, Drug Court and the Alcohol Abuse Deterrent Program, among others.
- Sexual Respect Program. This program addresses issues shared with “victimless” sexually-related offenses. The goal of this program is to help people to respect themselves and others.

These are a few of our programs and outreach services. We are very excited that we can offer a wide array of services to this community.
